Profile

Software Engineer mobile app development using Flutter and Dart. Proven ability to design, develop, and deliver high-quality mobile apps that meet the needs of users and stakeholders. Expertise in software design and architecture, team collaboration, and rapid learning.

Education

2019 – 2023 **Mansoura University Bachelor OF Computer & information Science**

Professional Experience

12/2024 – present UAE - Remote	flutter developer Idaam cloud Built and maintained mobile applications using Clean Architecture and Cubit ,Developed deep linking flows for seamless external navigation and app activation.Implemented real-time features using WebSockets for live updates ,Worked with audio and video calling using LiveKit , including real-time communication,Integrated = with AI-powered services , enabling smart automated features.Configured CI/CD pipelines to automate builds and deployments.
10/2025 – 01/2026 Egypt -Remote (part time)	flutter developer AB Advantage Worked on production Flutter apps (EZYXS & TRJRS) using Cubit for state management and integrating secure payment gateways . Improved code quality through refactoring and Clean Architecture practices, and enhanced UI/UX for better performance and user experience.
12/2024 – 09/2025 KSA- Remote (part time)	flutter developer Rowad Technology Developed and maintained scalable mobile apps using Flutter , Clean Architecture , and Cubit . Implemented real-time map tracking with Pusher channels for live order and driver updates. Integrated payment gateways , push notifications, and deep linking .Configured CI/CD pipelines to automate builds, testing, and deployment
05/2024 – 11/2024 Mansoura - full time	flutter developer Vision Company Developed and maintained production mobile apps using Flutter , MVVM , Cubit , and Provider . Integrated payment gateways , push notifications , and Google Maps features. Improved app performance, fixed issues, and delivered stable, high-quality releases.

Projects

Keme Meet

[google play](#) 📄 || [App store](#) 📄

Keme Meet is Brain Health USA's official communication and video conferencing application for staff and the Residency Program. It delivers secure, high-quality virtual meetings with instant access through meeting IDs or direct links.also supports background services on Android and iOS to maintain meeting continuity, Picture-in-Picture mode for multitasking during active calls, and deep linking that allows users to join meetings directly from shared invitation links.

Best Touch

google play [↗](#) || **App store** [↗](#)

Best Touch is a comprehensive automotive service platform that connects users with trusted car care professionals. The app allows customers to easily book services such as car washing, detailing, and maintenance, while securely sharing their location and service requests directly with providers for a faster and more efficient experience.

Brain health

google play [↗](#) || **App Store** [↗](#)

Brain Health USA provides personalized support for individuals looking to improve their cognitive well-being. Our team of licensed professionals offers therapy, coaching, and other mental health services to help clients achieve their goals and overcome challenges. With our app, clients can access their personalized treatment plan, schedule appointments, and communicate with their therapist or coach.

Zado

google play [↗](#) || **AppStore** [↗](#)

Zado is a food delivery platform in Iraq that connects users with leading restaurants. The app enables customers to browse menus, place orders, and track deliveries in real time, while a dedicated driver app allows drivers to accept and complete orders efficiently and reliably.

Zado Driver

google play [↗](#) || **App store** [↗](#)

Zado Driver is a dedicated delivery application that allows drivers to receive, accept, and manage delivery requests in real time. It provides order details, customer locations, live navigation, delivery status updates, and real-time location tracking to ensure fast and reliable deliveries.

Zado Restaurant

google play [↗](#)

Zado Restaurant is a restaurant management application that enables restaurant owners to manage restaurants, orders, and products from one platform. Users can add, edit, or remove restaurants and menu items, view incoming orders, update order statuses, and manage the full order lifecycle efficiently.

Ezyxs

google play [↗](#) || **App store** [↗](#)

Easy Access (EZYXS) is a sports venue booking platform that enables users to discover and reserve football, basketball, and other sports facilities. The app provides real-time time-slot selection, secure online payments, and a seamless booking experience from venue discovery to confirmation.

Trjrs

google paly [↗](#)

Trirs is an e-commerce platform specializing in handcrafted products, particularly Pharaonic-inspired creations. Users can browse products, add items to their cart, save favorites, and place orders seamlessly. The platform also allows sellers to create accounts, showcase their handmade products, manage their stores, and handle customer orders efficiently.

3D Titanuim (freelance)

google play [↗](#)

3D Titanuim App is a mobile platform designed for dentists, patients, and dental material suppliers. Dentists can create professional profiles, manage appointments, and receive bookings directly from patients. Companies can register to showcase and sell dental materials, allowing dentists to purchase from them instantly. Patients can easily browse doctors, view profiles, and book appointments with the dentist of their choice—all in one app.

Mrkabti (freelance)

[google play](#) [Preview](#)

Mrkabti is an app for Transport in **Palestine**, allowing users to register using their driving license. The app provides built-in insurance services, enabling you to report accidents instantly and contact ambulance, police, or emergency support through a dedicated chat system. It also includes a full marketplace where users can list, sell, and purchase products easily. Mrkabti brings transportation services, safety features, and e-commerce together in one integrated app.

Koshk

[google play](#) [App store](#)

Koshk is a smart electronics marketplace that enables users to browse and purchase devices such as smartphones, tablets, and televisions. The app allows customers to discover nearby vendors based on their location and communicate with them directly by phone for product inquiries, availability, and purchasing.

Skills

flutter	dart
oop	CI/CD
bloc-provider-GetX-Riverpod	Flavors
web Socket-Pusher Channels -Socket io	push notifications
google maps	payment gate ways
MVVM -Clean Architecture	Solid
github -gitlab	http -Dio
deep linking	fire base
Local storage (SharedPreferences, Hive,)	Design patterns
